Manufacturer's declaration

Combination of PPE:

A. Haberkorn ARAX series harnesses
and

respiratory protection systems from the Dräger PSS AirBoss series

On the basis of tests conducted by A. Haberkorn & Co. GmbH in cooperation with Dräger Safety AG & Co KGaA, we issue the following declaration:

The simultaneous use of PSS AirBoss¹ respiratory protection systems and the ARAX² harness worn underneath does not impair the protective effect of the individual items of personal protective equipment.

These combinations therefore comply with occupational health and safety requirements for the use of multiple PPE in Section 2 (3) of the PPE Usage Ordinance (PSA-BV).

Best regards,

Raphael Gruber
Engineering management

¹ All Dräger PSS AirBoss respiratory protection systems with standard lap belt or PSS Safety Belt in conjunction with a single Dräger compressed air cylinder made of CFRP or steel, Dräger PSS regulator and Dräger FPS 7000 respirator.

² All harnesses in the ARAX series
